Starstyle®-Be the Star You Are!®  
Wednesday at 4 PM Pacific  
**August 1st 2018: Sting Protection, Summer Health for Pets**

Yellow jackets are wasps and are not related to bees. Bees live in hives while yellow jackets create nests. Yellow jacket workers typically have black and yellow stripes on a ½ inch long body. They have the ability to sting several times, injecting poisonous venom that causes intense pain, while bees can only sting once because their stinger becomes stuck in the skin of its victim. Find out how to protect yourself from the stings of summer with Cynthia Brian. August is the hottest month of summer and your pets want to have fun in the sun while staying safe and cool. Heather Brittany and
