**April 5th 2017: More Carbon in the Soil, Less in the Sky**

A deep dive into the fascinating world of ethnaol as we seek to clean our air, and then onto the fast-growing world of engineered carbon to improve our soils. In our opening segment this morning as we explore the growth of ethanol not only as a domestic US industry but as a stellar performer in generating US exports and addressing the balance of carbon in the sky trade is Emily Skor, she's the new CEO at Growth Energy, a leading renewable fuels trade group. Later in the program we'll continue looking carbon — in this case, adding carbon to the soil to improve plant productivity and red
